## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 12, 17 and 18 are rejected under 35 U.S.C. 102(e) as being anticipated by Robinson et al. (US 6,478,589).

Robinson discloses a clamp-jaw contact assembly (416) comprising: a stationary contact (430) adapted to engage a meter socket cavity; a moveable contact (450) adapted to engage a meter bayonet; and a unitary member (at 454) pivotally mounting the moveable contact to the stationary contact and adapted to bias the moveable contact toward the stationary contact.

Regarding claim 18, please note that the method of forming a device is not germane to the issue of patentability of the device itself. Therefore, this limitation has not been given patentable weight.

### ***Allowable Subject Matter***

Claims 2-11, 13-16 and 19-22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2833

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Rund (US 3,003,085), Blackwell (US 5,334,057) and Norden (US 3,764,956) disclose meter socket clamp contacts.
